Food Folk

McDonald's in the Nordics

FOOD FOLK

Development licensee
of McDonald's

Master data specialist

Job ad

Are you passionate about data governance, ensuring the accuracy and quality of data within a dynamic and innovative environment? Do you also have a business mindset and problem-solving abilities? We are looking for a skilled Master Data Specialist to join an amazing team and play a key role in managing and optimizing data assets.

About the company
Food Folk is the official licensee of McDonald's in Sweden, Denmark, Norway, and Finland. With approximately 450 restaurants, the company is the leading Informal Eating Out (IEO) business in the region, based on market share. Their restaurants serve 160 million guests every year and generate over 1,6 billion Euros in sales. All these restaurants are interconnected, sharing data with Food Folk headquarters and external suppliers. This requires a big data infrastructure and that's where you come in.

About the role
As a Master Data Specialist, you will be responsible for managing and administrating Food Folk data item's meta-data and master data, ensuring alignment with business rules, and preventing misuse of data. Your expertise in data governance principles, data management practices, and data quality concepts, will be crucial for success.

You will be working at the centrally located Food Folk office at the Waterfront Building in the heart of Stockholm and work alongside a growing team of data engineers.
